Mr. Daniel Journeaux, President  
JANOD Contractors Ltd.  
190 Valois  
Vaudreuil-Dorion, Quebec, Quebec  
J7V 1T4

Dear Daniel,

**Decew Falls Generating Station No. 2 – Rock Face Stabilization**

Your company completed the above work at the end of October, 2004. We have received final documentation, and are currently closing out this project at our end.

I would like to take this opportunity to finally thank you, and all the employees involved for doing an excellent job.

Under sometimes difficult and demanding circumstances, the work was completed safely, in a timely manner, and without compromising quality.

The Janod personnel on site were friendly, professional and accommodating. The efforts put forth by Todd, Pierre, Dave and the rest of the team did not go unnoticed.

Having been to Decew several times this winter, I can report that the ring nets and mesh are functioning very well.

Once again, please accept my thanks and appreciation for this accomplishment.

Sincerely,

Tony Palma, P. Eng.  
Senior Plant Engineer  
Niagara Projects
