Dear Janod Team,

One word sums up your company, IMPRESSIVE! District 11 and the traveling public of the Ohio River Corridor cannot thank you enough for the work that was completed to help open our four lane highway that was closed after a substantial rockfall event. The efficiency of your main office and field staff was instrumental in getting this highway open in about ten days. It should be noted that your staff responded to my phone call on a Thursday and placed men on the site, ready to work, in less than 24 hours! With guys coming from New York, Michigan and California, that is something that should not and will not go unnoticed amongst our district personnel. The field guys were a pleasure to work with and kept everyone safe. We asked them to work ten to twelve hours days, everyday till the roadway was opened. This included working through two straight weekends without a single complaint from them. The slushing operation brought 3,500 cubic yards of material off the slope and was hauled off by our own District Staff. Not once did anyone complain about your workers and everyone had only nice comments to say about them. Our District is very thankful there is a specialty contractor on our prequalification list that is capable of completing such a task in such short notice. We look forward to working with you again. Finally, I would like to thank you one more time for the work your team has accomplished with this emergency project.

Sincerely,

A handwritten signature in blue ink, appearing to read "M. D. Bair".

Michael D. Bair

ODOT District 11
